INDICATION

REFERRING DOCTOR

Signature _____

Provider Number _____ Date _____

PREPARATION

Please bring your referral from your doctor. If you have had scans done elsewhere, please bring the images and reports with you, if possible. Empty your bladder one hour before your appointment and then drink 600 mls of water. Please refrain from emptying your bladder before your appointment. If you are feeling uncomfortable please inform the front reception staff.

OBSTETRIC ULTRASOUND EXAMINATION

Obstetric scans are generally performed on your abdomen. In early pregnancy and for other medical imaging reasons, a transvaginal ultrasound scan may be necessary.

GYNAECOLOGICAL ULTRASOUND EXAMINATION

Transabdominal and transvaginal examinations are usually required for adequate assessment. If you have any concerns, feel free to discuss them with your sonographer.

DURATION

You are welcome to bring your partner, family and friends. We suggest you allow around 90 minutes for your visit. Time is required for you to fill out demographic forms, have the ultrasound examination, images to be reviewed and for your report to be generated. QUFW is a tertiary level private ultrasound company and delays may occur due to managing high risk complex medical conditions. Your consideration is appreciated.
